SMALL COMPACTORS
BAG AND BIN COMPACTORS

- High compaction ratios
- Minimal space required
- Continuous loading
- Radical cost savings
- Easy to use

- Safe to operate
- CE certification
- Hygienic and fast handling of waste
- Achieve a reduction in labour time
- Hard wearing and long lasting

**CD-BAG1**

Hygienic, fast and economical handling of waste

The CD-BAG1 takes almost any type of waste: food, cartons, cans, bottles, plastic, cardboard, even light wooden crates. The compactor deals with waste at the point where it is generated, whether the kitchen, the office or the hospital. It takes up little floor space and can be fitted in easily to existing layouts. Waste is simply dropped in – there is no noise, no mess, no smell. The whole process is simple, clean and tidy.

When the container is full a red light indicates that the container can be removed for disposal and a new plastic bag be inserted into the machine. The compactor is low-maintenance: made of stainless steel, its smooth design requires only an occasional wipe down.

Waste collectors such as local authorities may put limits on the weight of a compacted bag. Fast food outlets, restaurants and hotels will be particularly conscious of this problem, which the CD-BAG1 can easily resolve with the adjustment of a simple thumbscrew, enabling the operator to control the size and weight of the compacted bag at all times.

Depending on the type of waste to be disposed of, compaction ratios of 6:8 or even 10:1 can be achieved, resulting in appreciable savings in your organisation’s disposal costs.

**Tech specs**

Width: 736mm  
Height: 1755mm  
Depth: 790mm  
Weight: 320–340kg  
Electrical data: 240V/50Hz  
Compaction force: 5 tonnes  
Compaction ratio: 6:8

---

I have found Compactors Direct to be not only very professional but extremely well organised too. Mercedes came to visit me just a few days after my arrival in my post to discuss what the company is all about and how the collections system operates and the recycling benefits.

From then on the service has continued to be of a very high standard. If there has ever been a problem or delay in collections, it has always been resolved without any disruption to the business and if we have required additional collections due to busier periods then Compactors Direct have always delivered.

They have also sat down with me to discuss ways in which the hotel can save money, which tells me they are not just thinking of their own business but yours too.”

Matthew Paxman-Hughes, Maintenance Manager, Great Northern Hotel

WE ALSO SUPPLY

- LARGE COMPACTORS
- BALERS
- CRUSHERS
- FOOD WASTE SOLUTIONS
- OTHER EQUIPMENT
  REDUCE WASTE, RECYCLE, CUT COSTS

SMALL COMPACTORS

BAG COMPACTORS

- Save time, money and space
- Compact system
- Safe and easy to operate
- CE certification
- High compaction ratios
- Continuous loading
- Hygienic and fast handling of waste
- Low maintenance
- Deals with waste at the point where it is generated

CD-BAG2

Proven success in waste compaction and cost reduction

Simple to service, requiring very little maintenance and complying with EC standards, the CD-BAG2 can be used at the point of waste generation in the workplace.

The CD-BAG2 grips, tears and compresses waste materials with a special hard-faced roller, guaranteeing a compaction ratio of up to 9:1. The roller compacts with an alternating rotation action, keeping waste constantly under pressure and making possible continuous feeding. Compacted waste is fed into a plastic sack, so the type of waste can be checked at any time.

Achieve high savings in costs and a clear reduction in labour use and time – anyone can feed the compactor. The CD-BAG2 contributes towards a cleaner working environment and can replace expensive, large containers which take up valuable space. It eliminates dependence on frequent waste removal journeys and is particularly suitable for dealing with reusable waste, such as cardboard, foil, cartons and cans, as well as general trade refuse. Hard-wearing and built for long-term use, the compactor offers a clean, hygienic and both space- and cost-saving solution.

Tech specs

- Width: 1210mm
- Height: 2200mm
- Depth: 1605mm
- Required height clearance: 2800mm
- Weight: 800kg
- Bale volume: 1m³
- Electrical data: 2.2kW / 380V/50Hz

Applications

Ideal for anywhere where light waste accumulates, such as:

- Supermarkets
- Canteen and hotel kitchens
- Restaurants
- Sites of food production
- Hospitals and care homes
- Service industries

Accessories

- Filling chute: opening height 1450mm
- Folding door with automatic opening
- Power crusher roller for foils with knife set, diameter: 580mm
- Cone roller with 24 cones for sturdy cardboard, diameter: 480mm
- Special fibre glass reinforced plastic pointed roof
- Electric eye for continuous use
- Fill level signal via siren or strobe lights
- Water sprinkling system to beat dust formation
- Ozone generator to beat unpleasant odours

SMALL COMPACTORS
BAG COMPACTORS

- Save time, money and space
- Compact system
- Safe and easy to operate
- CE certification
- High compaction ratios
- Top loading
- Hygienic and fast handling of waste
- Low maintenance
- Deals with waste at the point where it is generated

**CD-BAG3**

**Easy to operate and ready to compact wet or dry waste**

With its high compaction force ratio of 10:1, compact size and user-friendly low height, the CD-BAG3 can be used at the point of waste generation in the workplace.

The bag compactor is suitable for a wide range of wet or dry waste material, and features top loading and clear controls for ease of operation. A split chamber system enables easy bag removal following compaction, and the unit is wheel mounted for ease of movement. The CD-BAG3 has a powder-coated paint finish for durability, is CE marked and offers a cost-saving, clean and hygienic solution to waste generation.

**Tech specs**

- Width: 1200mm
- Height: 1900mm
- Depth: 620mm
- Weight: 325kg
- Electrical data: 1.5kW / 220–230V
- Pressing force: up to 3 tonnes
- Noise level: 70 decibels

**Applications**

Ideal for anywhere where light waste accumulates, such as:

- Supermarkets
- Canteen and hotel kitchens
- Restaurants
- Sites of food production
- Hospitals and care homes
- Service industries
- Industry
- Trade

SMALL COMPACTORS
BIN COMPACTORS

- Save time, money and space
- Compact system
- Safe and easy to operate
- CE certification
- High compaction ratios
- Continuous loading
- Hygienic and fast handling of waste
- Low maintenance
- Deals with waste at the point where it is generated

CD-BIN1

Eliminate expensive and bulky waste containers

Particularly suitable for wet waste and heavy use, the CD-BIN1 achieves maximum cost savings as well as a significant reduction in effort and labour. Simply position the compactor directly where waste is generated – the unit utilises manpower as anyone can operate it, even without training.

The CD-BIN1 can be fed continuously, whilst compacting waste, helping to keep the working environment tidy and efficient and eliminating the need for expensive and space-consuming waste containers – it requires less than 2m² of space and is only 2.3m high. The unit improves hygiene by discouraging vermin and insects and by minimising smells.

Compaction of the waste results in a reduction of the number of emptying journeys, keeping them to a minimum and resulting in drastic savings. Compaction ratios of up to 10:1 can be achieved by the CD-BIN1’s special power crusher roller, which collects, shreds and compacts at the push of a button. The wheelie bin – available with a 600 litre or 800 litre capacity – collects the compacted material and facilitates easy handling and convenient transport.

Applications

Ideal for anywhere where light waste accumulates, such as:

- Supermarkets
- Canteen and hotel kitchens
- Restaurants
- Sites of food production
- Hospitals and care homes
- Service industries
- Industry
- Trade

Accessories

- Special fibre glass reinforced plastic pointed roof
- Electric eye for continuous use
- Fill level signal via siren or strobe lights
- Water sprinkling system to beat dust formation
- Ozone generator to beat unpleasant odours
- Galvanized for application in aggressive environments

Tech specs

Width: 1150mm
Height: 1970mm
Depth: 1635mm
Required height clearance: 2300mm
Weight: 750kg
Electrical data: 2.2kW / 220–240V or 380–415V / 50Hz

SMALL COMPACTORS
BIN COMPACTORS

- Save time, money and space
- Compact system
- Safe and easy to operate
- CE certification
- High compaction ratios
- Continuous loading
- Hygienic and fast handling of waste
- Low maintenance
- Deals with waste at the point where it is generated

**CD-BIN2**

**Powerful compaction**
Get more from your 600 litre and 1100 litre bin press by compacting your waste with the CD-BIN2 bin press. Easy-to-use, it has a compaction force of 3:1 and its base lifting plate ensures the bin’s wheels are not damaged during compaction.

**Features**
- Compaction ratio of up to 3:1, depending on material
- Base-lifting plate insures bin wheels are not damaged during compaction
- Two-handed operation ensures a safe working environment
- Adaptor available to compact 660-litre bin

**CD-BIN3**

**Reduce weekly waste disposal collections and costs**
The innovative CD-BIN3 bin press will ensure you keep the waste in your 240 litre bins at a minimum, thus reducing weekly waste disposal collections and costs. As optional extras, the bin press comes with a wall-mounted option and can be galvanised.

**Features**
- Compaction ratio of up to 3:1, depending on material
- Base-resting plate insures bin wheels are not damaged during compaction
- Two-handed operation ensures a safe working environment
- Mobile, safe and easy to use
